

BOX ROTATOR BT201

VEGNIÉK

THE VERSATILE SOLUTION

- ✓ Versatility
- ✓ Protect your product
- ✓ Unique tipping mechanism

VERSATILITY

This compact forward tipping box rotator has been developed for smaller box sizes (eg bulb boxes) and is easy to mount to your forklift truck, front loader, lifting mast or telehandler. The box rotator can be used during all seasons, both in the storage as well as in the field. The machine is supplied as standard with an upper clamp for boxes of 1.2 or 1.5 mtr.

PROTECT YOUR PRODUCT

The dosed emptying is done with perfect control, so the drop height is always minimal (ideal for fragile products). The upper clamp can be fully reclined, so that several boxes can be transported simultaneously. There is less damage to boxes because the box is fully supported when rotating.

UNIQUE TIPPING MECHANISM

Unique tipping mechanism without pivots on the side of the box. So it is easy to pick-up boxes which are standing next to each other. Only 1 double acting hydraulic valve is required for all functions. The hydraulic system is designed in such a way that operating errors are excluded.

THE ADVANTAGES

- ✓ Efficient handling of the boxes: pick up, empty and put away
- ✓ Outflow of product far in front of the forklift over the entire width of the box
- ✓ Very compactly attached
- ✓ Good view of the forks
- ✓ Protected against operating errors
- ✓ Very fast and safe mounting and dismounting due to the supplied support

OPTIONS

- ✓ Fall breaker (for 1.5 m wide upper clamp).
- ✓ Different dimensions of the upper clamp are possible

SPECIFICATIONS

Maximum lifting capacity: 2000kg
Frontal extension length: 300mm
Center of gravity: 220mm
Forklift connection: FemII / FemIII
Weight without forks: 580 kg
Tipping angle: 148°
